Ms: Renata B. Hesse

Just a short note asking for a swift settlement of the Microsoft lawsuit, this whole thing started with Pres. Clinton, and Janet Reno, since then the landslide has taken this country economic situation from stable to recession. Microsoft has worked hard for the consumer and its stockholder, and has agreed to settle this situation out of court and make some competitors happy because they did not have the foresight and dedication to make a great product, and now they want the same access and market share that Microsoft has developd. Its time to move on with progress and settle this situation and get the economy moving again.

Thank you for your time and consideration.
